

LODI USD EDUCATORS!

“Teaching From a Watershed Perspective” Workshop

September 10, 2016

The City of Lodi Watershed Education Program invites you to attend an interactive workshop that will bring study of the environment to life through the hands-on activities of **Project WET (Water Education for Teachers)**! Your time will be engaged in *experiencing* the activities and you'll walk away loaded with classroom ready content to study the environment, human interactions and current standards!

The interdisciplinary activities of Project WET activities provide a wealth of real-life scenario based and interactive activities that will help bring alive **science & engineering practices (SEPs)**, **cross-cutting Concepts** and **disciplinary core ideas (DCIs)** at the core of the **Next Generation Science Standards (NGSS)** as well as rich language arts and math opportunities to dovetail with **Common Core Standards (CCSS)**. These features make Project WET effective tools for integrating student knowledge of the environmental and provide strong foundations for **STEAM, Service-Learning programs** and **Project-Based Learning** programs.

Each participant will receive: Hands-on experience with environment-based learning activities, a copy of the Project WET 2.0 Guide and free access to over 110 Project WET activities, lunch, a wealth of knowledge on local water resources and an opportunity to purchase CEU credits!!

Saturday, September 10, 2016 (10:00 am – 4:00 pm)

Hutchins Street Square,
125 Hutchins Street,
Lodi, CA 95240
